‘Orca Echolocation’

(To the tune of ‘Head, Shoulders, Knees and Toes’)

Head, dorsal fin and fluke

Fin and fluke

Head, dorsal fin and fluke

Fin and fluke

And…

Eyes and jaw, blow hole and teeth

Head, dorsal fin and fluke

Fin and fluke

Lyrics by Julie Jenkins
Orca Class 2011-2012
CMP-Carmichael

The Penguin Song

Written for the Penguin Class, CMP-Carmichael

© Gary Bowman, 2011

I'm a black & white penguin, I live way down south.

I'm a black & white penguin, I live way down south.

When I get hungry, I pop a little fishy (Pop!) in my mouth.

I've got a lot of friends, they are all so nice.

I've got a lot of friends, they are all so nice.

We go slippin' & slidin' on the chilly ice.

I've got a lot of friends and they all like me.

I've got a lot of friends and they all like me.

We all go swimming in the polar sea!

I'm a black & white penguin, I live way down south.

I'm a black & white penguin, I live way down south.

When I get hungry, I pop a little fishy (Pop!) in my mouth.

‘Rock Zoology’

Lyrics by Tom Freer, CMP-Shingle Springs
(To the tune of ‘Old Time Rock and Roll’)

Let's talk about phylum arthropod,
With two or three segments on their bod,
Head, thorax and abdomen,
And a really strong exoskeleton

From a millipede to a flea,
They have bilateral symmetry
They are everywhere that you seek,
Their name means jointed foot in Greek

One special class is arachnid,
They lay eggs if they want a kid,
With eight legs and lots of eyes,
They hunt their food to get their prize

Class insect has only 6 legs,
And they can lay lots and lots of eggs,
A tympanum that lets them hear,
Because they don't have any ears

Bees are vital in the order of things,
For pollination and the food it brings
We must love them even with the stings,
The queen's in charge, not the king

Locusts swarm when they're hungry,
They can travel through 20 countries,
They eat everything in their sight,
It is enough to give you a fright

Courage is…

What does it take to stand up for yourself? Courage! Courage!

When someone you love is steering you wrong? Courage! Courage!

What does it take to try something that's scary? Courage! Courage!

What do you do to face all of your fears? Courage now!

Courage is trying hard 'though you are scared
But courage might also mean dangerous dares
Courage can mean putting someone else first
But taking great risks might mean we get hurt!

Courage! Courage! Courage now!

How am I careful for how others feel? Courage! Courage!

How can I always be doing my best? Courage! Courage!

How can we always be just who we are? Courage! Courage!

How do I ignore the mean things people say? Courage now!

We take a big chance when we always stand tall
For others might judge us and make us feel small
So be careful with courage and still use your brain
Take chances that keep yourself safe, well, and sane

Courage! Courage! Courage now!
