Surround Students with Science, Engineering
As students move through grade levels, it is important to reinforce key science and engineering concepts so students revisit them. Students must have the opportunity to deepen their understanding by building on prior knowledge.

Keeping hands-on learning tools available at each grade level is the best way to reinforce learning each year.

In case an educational dollar shortage should occur, those seeking grant assistance should see below.

Investing in Innovation

The purpose of the program is to provide financial support to districts that devise innovative strategies to improve student achievement.

Charles Stewart Mott Foundation
This foundation sees education as the pathway out of poverty and sees educational inequality as an obstacle. http://www.mott.org/grantseeker.aspx

DCAT Making a Difference Award
This award goes to schools recognized as having programs that expand the interests of students in science exploration and how it applies to global problems. http://www.nsta.org/pdfs/awards/DCAT.pdf

Toshiba/NSTA ExploraVision Competition
ExploraVision, sponsored by Toshiba and administered by the National Science Teachers Association (NSTA), challenges teams of two to four students to research scientific principles and current technologies as the basis for designing innovations that could exist in 20 years.
