A quality Montessori school is successful in meeting this standard when it commits to a shared mission, vision, and direction as outlined in a Strategic Plan. The school establishes expectations for student learning aligned with the school's vision and in keeping with the Montessori philosophy that is supported by school personnel and external stakeholders. These expectations serve as the focus for assessing student development and school effectiveness. The school's vision guides allocations of time, human, material, and fiscal resources.

SCHOOL ACCREDITATION STANDARDS AND CRITERIA

STANDARD 2: GOVERNANCE, LEADERSHIP, AND CONTINUOUS IMPROVEMENT—Strategic Plan

The quality Montessori school promotes student learning and school effectiveness through strong governance and leadership and establishes, implements, monitors, and refines a strategic planning process to demonstrate continuous improvement.

GOVERNANCE

CRITERIA:

- 2.1 Establishes policies and procedures that provide for the effective operation of the school, including a system for short- and long-term sustainability of the governing body and school leadership.

- 2.4 Ensures compliance with applicable federal, state, and local laws, standards, and regulations. If the school is exempt from licensing or compliance, written exemption of current issue (within the last five years) verifying exemption from the appropriate federal, state, and/or local agency is necessary to show compliance. It is the school's responsibility to be aware of all these laws and regulations and to take steps to be and remain in compliance. It is not the responsibility of AMS or the Visiting Team to verify compliance independently. Accreditation by AMS is not certification of a school's compliance with applicable laws and regulations.

AMERICAN MONTESSORI SOCIETY

SCHOOL ACCREDITATION STANDARDS AND CRITERIA

STANDARD 3: TEACHING AND LEARNING – Educational Nature

The quality Montessori school operates comprehensively within Montessori philosophy and provides a Montessori curriculum and Montessori instructional methods and materials that facilitate learning for all students.

CRITERIA:

- 3.1 Develops and implements a Montessori curriculum based on clearly defined expectations for student learning.
- 3.2 Promotes active involvement of students in the learning process, including opportunities to explore application of higher-order thinking skills and investigate new approaches to applying their learning.
- 3.3 Gathers, analyzes, and uses data, research, and classroom observation in making curricular and instructional choices.
- 3.4 Designs and uses instructional strategies, innovations, and activities that are research- and observation-based, meet student needs, and reflect best practice.

Curriculum Design and Implementation of Instructional Programs

The school provides a comprehensive Montessori educational curriculum based on the Montessori planes of development and implemented by Montessori-credentialed instructional staff as outlined in Standard 5. The school uses supplementary programs and materials that are deemed necessary to enhance the basic core curriculum for their student population. Activities in peace and cosmic education reflect the Montessori philosophy of peace and harmonious coexistence based on mutual respect that should be evident at all levels. The Montessori curriculum at all levels includes opportunities for community service within and beyond the school community, outdoor exploration and education, and experiences outside the classroom to expand learning (“going out”). To address the needs of the whole child, the curriculum promotes the students’ cognitive, physical, social-emotional, spiritual, and psychological development. Activities provide purpose, procedure, closure, and opportunity for success.

Schools are expected to demonstrate the following curriculum planning and implementation indicators:

3.4.1 Infant/Toddler (Birth – 3)

Curriculum planning at the 0 - 36 month level is extremely dependent upon developmental characteristics. The teacher plans the daily activities and general program goals based on the capabilities and interests of the child. Learning cannot be separated from motor development at this age. The structure of the curriculum is based on six developmental areas: sensory and perceptual, cognitive, physical, gross and fine motor, self-help skills, and social/emotional development. Materials allow children to explore, absorb, and experience their environment through their senses and kinesthetically.

AMERICAN MONTESSORI SOCIETY

SCHOOL ACCREDITATION STANDARDS AND CRITERIA

3.4.2 *Early Childhood (2.5 – 6)*

Curriculum planning at the 2.5 – 6 year level integrates Montessori's fundamental philosophy of the child with the core areas of Practical Life (including grace and courtesy and care of self, others, and the environment), Sensorial, Math, Language, Peace and Cosmic Education, and Cultural Subjects (including Geography, History, Botany, Zoology, Physical Science, Art, and Music). The learning environment is student-centered and designed to promote the development of order, coordination, concentration, independence, cooperation, collaboration, inner discipline, self-motivation, self-regulation, and respect for self, others, and the environment. Self-directed learning includes choice, learning from built-in controls of error, and completing cycles of work by choosing, completing, and returning materials.

3.4.3 *Elementary I (6 – 9) and Elementary II (9 – 12)*

Curriculum planning at the elementary level considers that the student is entering a new plane of development characterized by tremendous imagination, critical thinking, critical questioning, a strong sense of morality and justice, and a strong need for peer relationships. Individually-paced academic progress allows students to explore their interests and acquire the mastery of basic skills and knowledge, including basics such as: numeracy and math facts, spelling, vocabulary, grammar, sentence analysis, creative and expository writing, and using technology for research and communication. In addition, the Montessori elementary learning environment offers activities that provide deeper educational experiences in the areas of: Mathematics (including Geometry and Algebra), Biological and Physical Sciences, Technology, Language Arts and Literature, History, Physical and Political World Geography, Civics, Economics, Anthropology, Peace and Cosmic Education, and areas of Art, Music, Additional/World Language, and Physical Education. Students have opportunities to plan, monitor and assess their own work, thereby enhancing their independence and responsibility for their own actions. The learning environment is student-centered and designed to promote the development of organizational and time management skills, conflict resolution skills, concentration, independence, cooperation, and collaboration.

3.4.4 *Secondary I (12 – 15) and Secondary II (15 – 18)*

Curriculum planning at the secondary level is a continuation of the Montessori curriculum at a deeper level. The curriculum at the secondary level increases students' development in decision-making, problem solving, community building, and applying this learning to their lives and the larger community. Students expand on their cumulative experiences in the creation and care of the environment. Students have opportunities to plan, monitor, and assess their own work, thereby further developing their independence and responsibility for their own actions. The Montessori secondary curriculum includes opportunities for community service and career exploration, economic exploration, technology, activities in the humanities, peace and cosmic education, physical education, creative arts, outdoor education, and field studies.

The secondary II (high school) curriculum continues to support the adolescent in valorization of the personality and stewardship of the Earth and humanity. These are essential aspects of a program for the older adolescent. This includes field experience and service opportunities. The curriculum expands on the work and elements in the Secondary I program, and prepares students for post-secondary education or careers

AMERICAN MONTESSORI SOCIETY

through self-construction, extensive self-reflection, and opportunities for leadership and personal responsibility.

3.5 Structures classes with multi-age groupings

Multi-age grouping is an integral part of the Montessori philosophy at all levels. Philosophically, the rationale is that individuals learn from each other with opportunities to lead, share, and serve as role models for their peers. Students can accelerate or take additional time as needed to learn skills. AMS Teacher Education Programs prepare teachers to work with a 3-year age span and to have the expertise to support skills both above and below a developmental level.

Age groupings must be as follows:

- Infant/Toddler: Children from birth to 3 years of age may be grouped in varying multi-age configurations. A stand-alone classroom serving only 3-year olds does not satisfy this Criterion.
- Early Childhood: a 3-year age group within the range of 2.5 years to 6 years
- Lower Elementary: 6 years to 9 years
- Upper Elementary: 9 years to 12 years
- or Elementary I-II: ages 6 years to 12 years
- Secondary: the school must offer an age grouping of either 12-14, 14-16, 16-18 years of age or 12-15, 15-18 years of age

Schools with multi-age grouping variances listed in the document “Grandfathered Multi-Age Grouping Variances 2014” (dated October 3, 2014) are grandfathered such that they may maintain the age-grouping(s) for which the variances were granted. The accreditation status of these schools must be noted in their listing on the AMS website and in all other AMS accredited school listings, as well in the schools’ own marketing materials. The exact wording that must be used is: “Accredited with non-traditional Montessori age groupings.” Failure of a school to comply with this language will result in revocation of AMS accreditation.

3.6 Maintains ratios and maximum group sizes as follows:

The lowest ratio required by licensing or other accrediting agency supersedes AMS requirements for ratios and maximum group size. Where licensure or other accreditation standards do not specify ratios or group size, the following applies:

The ratios of students to teaching staff, both Montessori-credentialed and assistant teacher/aide/paraprofessional, is appropriate for the age level:

Infants (Birth – 18 months):	4:1
Toddler (18 – 36 months):	8:1
Early Childhood (2.5 – 6 years):	15:1
Elementary (ages 6 – 12 years):	20:1

AMERICAN MONTESSORI SOCIETY

SCHOOL ACCREDITATION STANDARDS AND CRITERIA

Secondary (ages 12 – 18 years): 20:1

The school assigns no more than the maximum number of students to each Montessori credentialed teacher that is appropriate to the age level:

Infants (Birth – 18 months):	8
Toddler (18 – 36 months):	16
Early Childhood (2.5 – 6 years):	30
Elementary (ages 6 – 12 years):	30
Secondary (ages 12 – 18 years):	30

- 3.7 Offers a curriculum that challenges each student to excel, reflects a dedication to equity, and demonstrates a commitment to diversity.

- 3.9 Allocates and protects 2- to 3-hour blocks of uninterrupted instructional time to support student learning. Schools schedule enrichment programs and transition times to accommodate these blocks.

- 3.13 Maintains an environment that incorporates materials, structure, and leadership to best meet the needs of all students.

3.13.1 *Facilities, Instructional Materials*

Classroom environments in quality Montessori schools are equipped with a full range of fundamental Montessori materials, aesthetically displayed and easily accessible to students. Curriculum support materials to meet the needs of the children may be incorporated into the classroom. Schools inspect and evaluate materials regularly for completeness and good working condition and keep a school-wide inventory of all instructional materials and furnishings, including a repair and replacement plan.

A list of fundamental and other suggested materials for each age level is provided in the AMS School Accreditation Handbook. This guides quality Montessori schools in preparing and assessing environments and selecting materials for each age level.

Classroom environments in quality Montessori schools are equipped with furnishings (tables, chairs, etc.) of sizes and quantity to meet the needs of students.
